

Nawat Pimolsathien

นวัต พิมลเสถียร

Backend & Full-stack Software Engineer · Computer Engineering & Digital Technology, Chulalongkorn University

nawatpim@gmail.com · 088-864-5743 · nawatpim.com · github.com/nawat-john · linkedin.com/in/nawat-pimolsathien · Nonthaburi, Thailand

Fourth-year Computer Engineering student at Chulalongkorn University, currently building software at Muang Thai Life Assurance. I work end to end — Go, NestJS, .NET and Node on the backend, Next.js and React on the front, PostgreSQL, Redis and Docker underneath — and I ship projects all the way to deployment, from event-driven services to running systems on-premise and in the cloud.

FLAGSHIP PROJECT

satang — event-driven double-entry ledger in Go

github.com/nawat-john/satang

Money-transfer backend in Go: idempotent transfers (Redis plus a database unique constraint), ordered row locking to prevent deadlocks, a transactional outbox publishing to Kafka, and an async fraud-detection consumer with retries and a dead-letter queue — two independently deployable services, a ledger API and a risk worker, communicating over Kafka. REST (Gin) and gRPC share a single service layer. Unit and integration tests with testify and testcontainers; benchmarked pessimistic against optimistic locking under contention. Traced end to end with OpenTelemetry and Jaeger, metrics in Prometheus and Grafana, deployed with Docker Compose and Kubernetes manifests, CI on GitHub Actions.

EXPERIENCE

Software Engineer Intern

Aug 2025 — Present

Muang Thai Life Assurance PCL.

- Built a sales-assistance chatbot on a multi-agent + RAG architecture using Python, LangChain and LangGraph.
- Develop and modernize web applications migrated from legacy systems, writing unit and integration tests to guarantee behavior is preserved through the rewrite.

Software Developer (Intern / Part-time)

May 2025 — Sep 2025

Power Partner Co., Ltd.

- Developed add-ins for CAD software in C# and .NET, shipping features from real client requirements.
- Migrated existing add-ins from .NET Framework to .NET (Core) LTS.

Teaching Assistant

Aug 2024 — Mar 2026

Chulalongkorn University

- TA for Frontend Development (Next.js), Data Structures & Algorithms, and Digital Computer Logic.
- Debugged student code daily, tracing root causes across frontend and algorithm assignments; graded work and answered technical questions.
- Invited back as Frontend Development TA for a second term.

Software Engineer Intern

May 2024 — Jul 2024

NITMX Co., Ltd.

- Built full-stack websites with Next.js and Node.js, and wrote backend code in Java, at Thailand's national payment infrastructure operator.
- Designed the UI in Figma and the database schema; studied the team's Go microservices and Kafka-based event streaming for payment processing.

EDUCATION

B.Eng. Computer Engineering & Digital Technology

2023 — 2026

Chulalongkorn University · GPAX 3.71 / 4.00

Coursework: Software Engineering · Database Systems · Data Structures & Algorithms · Computer Networks · Operating Systems & Systems Programming · Capstone Project I–II (A).

Full transcript and TOEIC score report available at nawatpim.com.

LANGUAGES

Thai — native · English — TOEIC 900 / 990

TOOLKIT

// backend

Go · .NET / C# · Node.js / NestJS · Java
Spring Boot · C++

// distributed systems

Kafka · gRPC · Kubernetes · Prometheus /
Grafana / OpenTelemetry

// data & infra

PostgreSQL · Redis · MinIO · Docker ·
Caddy · Cloudflare

// frontend

Next.js · React · Figma

// ai & ml

Python · TensorFlow · scikit-learn ·
LangChain / LangGraph

MORE PROJECTS

Aurum — gold-shop order management system

private client work

Order management platform for a gold retailer. Next.js + NestJS monorepo, PostgreSQL, Redis for logs, MinIO for objects, behind Caddy and a Cloudflare Tunnel; deploys on-premise or to the cloud. Code private; walkthrough on request.

pholama

Experiments in compressing large language models.

air-hockey RL

Reinforcement-learning agent that learns to play air hockey.

Acad_WebView2

C# CAD add-in with an embedded modern web UI.

Let's build something

Open to backend and full-stack software engineering roles.
